Application/Control Number: 09/443,158

Art Unit: 2166

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 110-131, drawn to a method for processing sales, classified in class 705,

Page 2

subclass 5.

II. Claims 98-109 and 132-139, drawn to a processing system with memory,

classified in class 700, subclass 99.

Inventions I and II are related as process and apparatus for its practice. The inventions

are distinct if it can be shown that either: (1) the process as claimed can be practiced by another

materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be

used to practice other materially different processes, such as word processing, developing spread

sheets, computer programming, playing computer games or sending electronic mail.

Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art because of their recognized divergent subject matter, restriction for

examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

Any inquiry concerning this communication should be directed to Sam Rimell at

telephone number (703) 306-5626.
